CoMoveIT Flex

- Intelligent head or head-foot control
- Advanced real-time and continuous adaptation to the user, limiting pathological high tone
- Up to 5 head pads and 4 foot pads
- Minimal activation force level, easy to adjust per pad
- Switched or proportional driving mode
- Integrated reverse and relax functions

The **CoMoveIT Flex** is a groundbreaking steering solution designed for people with Cerebral Palsy and other severe motor disabilities.

By addressing the core challenges: low force, limited range of motion, involuntary body extension, and dyskinetic movements, CoMoveIT Flex delivers a remarkably smooth, intuitive, and confident driving experience, even for users with complex movement patterns.

With the modular design with 9 pads, all driving functions as well as on-touch reverse, heel sensor activation, relax mode, and more can be configured to individual abilities, without the need for a service call.

CoMoveIT Flex opens a window to independent mobility, participation and beyond.

It reflects a strengths-based philosophy, aligned with the F-words linked to the ICF model: Function, Fitness, Friends, Family, Fun, and Future – Flex captures them all.

Direct access to adaptive gaming controllers

CoMoveIT Smart

- Intelligent head or head-foot control
- Pioneering adaptive technology
- Intuitive, easy to learn
- Plug 'n' play
- Proven solution since 2022
- Evidence-based development

“Yes, he’s a child full of the joys of life, and I do everything I can to ensure that he grows up happy, that he lives like any other child, without his disability becoming a barrier to his development. My greatest wish is that he never feels different or is deprived of his childhood.

The head control, **CoMoveIT Smart**, is an extraordinary advance – a real ray of hope. It will open doors to greater autonomy, expression and freedom! Thanks to it, he will finally be able to develop fully, in his own way, at his own pace. It’s really great!”

Mom of little boy

CoMoveIT Drive

- Excellent proportional head steering
- Slim design with 5 soft-touch head pads
- Highly sensitive, intuitive control
- Durable, budget friendly solution
- User ready, out of the box

CoMoveIT Drive is the next-generation head control for people with MS, tetraplegia, and other neuromuscular conditions.

CoMoveIT Drive brings the essence of what matters most: the freedom of independent mobility.

Its slim 5-pad design, easy positioning and high sensitivity is unique and fits individual abilities.
