# CoMoveIT Flex

## Advanced head control for complex movement needs

CoMoveIT Flex is individually configurable, detects intentional head movements and translates them into controlled driving commands for a smooth, confident driving experience, even with complex movement patterns.

### Key features

- ✓ Auto-adapting to the user
- ✓ Individually adjustable sensor sensitivity
- ✓ Integrated reverse and relax functions
- ✓ Direct access to gaming, AAC and computer
- ✓ Proportional or switched driving
- ✓ Up to 9 configurable sensor pads
- ✓ Optional foot inputs
- ✓ Easy to adjust

## More than just wheelchair control

CoMoveIT Flex can also provide access to additional functions such as computer control, communication and gaming, extending the same familiar input method beyond mobility.

# CoMoveIT Drive

**Precise head control.  
Smooth driving.**

CoMoveIT Drive is the next generation of head control. It translates all head movements into smooth, precise driving commands, allowing users to control their powered wheelchair reliably and independently.

## Key features

- ✓ Proportional or switched driving
- ✓ 5-sensor design
- ✓ Broad sensitivity range
- ✓ Command smoothing
- ✓ Individual configuration
- ✓ Robust and durable

**And where it all started**

---

## CoMoveIT Smart

**Build on research. Shaped by experiences.**

CoMoveIT Smart brings together scientific research, clinical expertise and technological innovation. Developed in close collaboration with healthcare professionals, researchers and engineers, it offers a proven solution for people who cannot operate their powered wheelchair using conventional controls.

# Three solutions. One personal fit.

A compact guide — the final configuration is always matched to the user.

|                                      | FLEX<br>(with foot control) | FLEX | DRIVE |
|--------------------------------------|-----------------------------|------|-------|
| 5-sensor head control                | ✓                           | ✓    | ✓     |
| Proportional or switched driving     | ✓                           | ✓    | ✓     |
| Easy to adjust                       | ✓                           | ✓    |       |
| Auto-adapting                        | ✓                           | ✓    |       |
| Direct access to gaming/AAC/computer | ✓                           | ✓    |       |
| Up to 4 foot sensors                 | ✓                           |      |       |

“Flex is adapting to the way I move, giving me the freedom to go where I want and live life in my own way.”

• Ellie, CoMoveIT Flex user
